

SEBI Web Accessibility Compliance (WCAG 2.1 AA)

1. PERCEIVABLE

- Provide alt text for all images and non-text content
- Provide captions and transcripts for audio/video
- Use semantic HTML structure
- Ensure proper contrast (4.5:1)
- Allow text resizing up to 200%
- Ensure responsive layout without horizontal scroll

2. OPERABLE

- Website must be fully keyboard accessible
- Provide skip navigation links
- Avoid keyboard traps
- Provide visible focus indicators
- Avoid flashing content
- Provide sufficient time for user actions

3. UNDERSTANDABLE

- Define page language
- Use clear labels and instructions
- Provide error messages and suggestions
- Maintain consistent navigation
- Avoid unexpected behavior

4. ROBUST

- Use valid HTML
- Ensure compatibility with screen readers
- Use ARIA roles properly
- Ensure dynamic content updates are announced

SEBI / GIGW Additional Requirements

- Accessibility Statement page is mandatory
- PDF documents must be accessible and tagged
- Website must support NVDA, JAWS, VoiceOver
- Forms must have proper labels and validation
- Mobile accessibility must be ensured
- No auto-playing media
- Consistent navigation and sitemap required

Final Compliance Requirement

All websites must comply with WCAG 2.1 Level AA without critical issues. All checkpoints from SEBI accessibility audit (rows 6–220) are mandatory.
